Summary

Data Scientist and AI graduate student with 2+ years of experience in machine learning, predictive analytics, dashboard development, and AI-powered applications. Skilled in Python, SQL, Scikit-learn, TensorFlow, XGBoost, Tableau, Power BI, and statistical analysis with expertise in forecasting, anomaly detection, feature engineering, data visualization, and transforming complex datasets into actionable insights.

Skills

Programming & Databases: Python, SQL, VBA, Excel, Object-Oriented Programming

Data Science & ML: Machine Learning, Predictive Modeling, Statistical Analysis, Feature Engineering, Classification, Regression, Forecasting, Anomaly Detection, NLP, Generative AI, Model Evaluation

Libraries & Frameworks: Scikit-learn, TensorFlow, Keras, XGBoost, Pandas, NumPy, Matplotlib, Plotly, OpenCV

Analytics & Visualization: Tableau, Power BI, KPI Reporting, Dashboard Development, Data Visualization, Business Intelligence, Data Storytelling

Data Engineering: ETL Pipelines, Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Workflow Automation, API Integration

Tools & Platforms: GitHub, Jupyter Notebook, VS Code, Qualtrics, Streamlit, FastAPI, AWS Cloud Fundamentals

Work Experience

Graduate Assistant - Data Analyst

Jan 2025 - May 2026

Office of Educator Preparation, Texas State University, San Marcos, TX

- Analyzed 10,000+ student and institutional records using Python, SQL, Excel, and Qualtrics to identify trends, improve reporting accuracy, and support data-driven decision-making.
- Developed Tableau dashboards and automated ETL workflows that reduced manual reporting effort by 40%, improved KPI reporting, and streamlined compliance analytics processes.
- Performed data preprocessing, transformation, validation, and exploratory data analysis on large datasets to support operational analytics and strategic planning initiatives.

Data Science Intern

Sep 2023 - Feb 2024

SAGE

- Developed analytics and predictive workflows to analyze user behavior patterns, engagement trends, and feature performance, contributing to a 25% increase in community engagement.
- Designed KPI dashboards using Power BI, Excel, and VBA automation to analyze retention, activation, and growth metrics across 50,000+ user interactions.
- Performed data collection, cleaning, transformation, and exploratory analysis to generate actionable insights for product optimization and marketing analytics.

Projects

Lumivise - AI Data Analyst Platform | *Python, Streamlit, Pandas, Plotly, Google Gemini API*

- Developed an AI-powered analytics platform that transforms raw datasets into interactive visualizations, KPI dashboards, executive summaries, and downloadable business intelligence reports.
- Built automated preprocessing, anomaly detection, trend analysis, and AI-driven recommendation workflows using Python, Pandas, Plotly, and Generative AI integration.

AI Cyber Threat Detection System | *Python, Scikit-learn, XGBoost, Pandas, NumPy*

- Developed machine learning models using Random Forest, Logistic Regression, XGBoost, and Isolation Forest to classify malicious network activity and detect anomalous behavior.
- Built scalable preprocessing pipelines, feature engineering workflows, and evaluation dashboards using ROC-AUC, F1-Score, confusion matrices, and predictive risk scoring analytics.

AI-Driven Marketing ROI Dashboard | *Tableau, SQL, Excel, Predictive Analytics*

- Designed an interactive Tableau dashboard to analyze campaign ROI, customer lifetime value, cohort behavior, attribution performance, and marketing effectiveness.
- Developed forecasting models, funnel analysis workflows, KPI dashboards, and customer segmentation analytics to support strategic business decision-making.

Education

M.S. in Computer Science, Texas State University, San Marcos, TX

Aug 2024 - May 2026

B.Tech in Artificial Intelligence and Data Science, SVECW, India

Aug 2020 - May 2024

Certifications

AWS Academy Graduate - Machine Learning Foundations | AWS Academy Graduate - Cloud Foundations
